Experience

- Web developer at DirecTV
    - May 2017 - present
    - HTML/CSS/JS/PHP used in front end work
    - Front-end developer; built out front end for a redesign of a site and built a small informational website using Kirby CMS

- ○ Worked on creating a custom style guide for internal use (think Bootstrap)
- ○ Worked directly with a designer converting PSDs to websites
- ○ All projects listed above were made responsive as well
- Web developer at Inked Brands.
  - ○ September 2016 - April 2017
  - ○ HTML/CSS/JS/jQuery/Ruby on Rails/Git/Bash used in front end work
  - ○ Front-end developer; creating view templates for new features on their custom built platform (Ruby on Rails) that brought a better experience to the user
  - ○ 90% of SCSS maintained affected the entire platform, shared across multiple sites
  - ○ Turned designs from UX/UI team into responsive pages
  - ○ Began a conversion to from jQuery to Javascript, platform wide
  - ○ Handling bugfixes and improvements on that platform, which increased functionality and usability on mobile platforms
- Web developer at Partnercomm, Inc.
  - ○ August 2014 - September 2016
  - ○ HTML/CSS/JS/jQuery/Git used on all projects
  - ○ PHP/MySQL used for Wordpress projects, C#/MySQL used on different projects with the .NET team
  - ○ All projects coded to be compatible with IE8+ browsers
  - ○ Primarily a front-end developer; working directly with back-end engineers on both Wordpress and C# platforms, bridging the gap between design and function
  - ○ Committed changes to an in-house custom theme with a custom framework, which resulted in more concise, mobile friendly code
  - ○ Created several sites from scratch based on the Wordpress platform; in charge of site maintenance for those projects
- Lead QA Tester at Hitcents.com
  - ○ August 2013 - July 2014
  - ○ C# used in application testing
  - ○ Working in software development; consulted on application development, from pre-production and planning to early iteration debugging to post-production analysis
  - ○ Created a small space-shooter game as an exercise in C#
  - ○ Responsible for finding bugs in app and locating block of code responsible for the bug; creating detailed bug reports for developers to replicate and fix bugs
- Contract work for IncrediPixel
  - ○ February 2014
  - ○ Front-end development with HTML5/CSS3

- ○ Applied a responsive design for multiple devices

Education
- Florida College: Graphic Design major (Fall 2006- Fall 2008)
  - ○ Activities: Zeta Phi Epsilon, yearbook, chorus
- Beech High School
  - ○ Graduated in May 2006
  - ○ GPA: 3.7 (out of 4.0)

Community Service/Extracurricular Activities
- Hosted weekly Bible studies for young people's group at church
- Counselor at Florida College youth summer camp (June 2013, June 2014, June 2015)
- Member of Big Brothers, Big Sisters (May 2012-July 2014)
- Career day at Castleberry Elementary School
